Speed Check

FEATURES AND BENEFITS

SpeedCheck Specifications

- ⊙ Superior visibility in all conditions; Safety Mask™ prevents viewing of the sign outside of driver's normal field of vision.
- ⊙ Vandalism protection –an unbreakable window, in combination with internal components that flex up to 6cm, allow the SpeedCheck display to survive a substantial direct blow without damage.
- ⊙ Integrated Violation Alert, High Speed Cut-off and optional Slow Down Message at user-defined speed thresholds.
- ⊙ Displays speeds from 5km/h to 99km/h.
- ⊙ QuickChange™ brackets enable signs to be moved easily between several locations.
- ⊙ Attaches to mounting pole with U-bolts, clamps, or stainless-steel banding.
- ⊙ Portable pole-mounted and boot-mounted options available.

Case Studies

Company Car Parks

The OH&S manager of a large Sydney corporation was concerned at the level of speeding in the company's car parks. The manager authorised the trial of two Speed Check signs fitted with a digital camera that could email the images of offending vehicles back to her PC.

The trial was so successful in curbing speeding, that the signs are now a permanent fixture.

Road Works

The Gold Coast Bulletin (October 2, 2010) reports on an initiative aimed at increasing safety for road workers. The SpeedCheck sign made a "big difference" in slowing two kids and I like to go home at the end of the day," he said.
